Focusing on the skills that are the most labor intensive to learn and that pose the greatest risk to patient safety, this online course is the perfect

tool to help you review and evaluate your competency before performing skills in the clinical setting. This one-of-a-kind online course includes 17 modules with each module comprising several lessons. Each lesson provides you with a variety of interactive exercises and self-check activities that allow you to test your comprehension and ask you to apply concepts. You can also view the video for each skill from start to finish, pausing and repeating segments as desired. Each lesson includes an exam that can be scored immediately, with feedback that provides the rationale for the correct answer, and each module concludes with a test. Provides over 700 activities to encourage decision-making, critical thinking and self-evaluation. Case-based/problem-oriented format of learning activities relate to real-life patient scenarios. Varied self-assessment exercises - over 750 - allow you to test your knowledge of key concepts throughout the module. Lesson exams may be scored immediately and feedback provides

rationale for the correct answer. Scramble function allows you to reset an exercise so the problem is reordered and presented anew. Colorful visuals and graphics (over 800 images) provided on screens increase engagement and provides context when applicable. Over 100 video clips demonstrating procedures can be viewed from start to finish, pausing and repeating segments as desired. Over 100 printable Procedure Guides provide a study tool for later review. With a greater emphasis on, and integration of, interprofessional collaboration, health literacy, and clinical reasoning, Canadian Fundamentals of Nursing, Sixth Edition provides you with the solid educational foundation to learn nursing principles, concepts, and skills with ease. The text's proven, reader-friendly approach describes the principles, concepts, and skills essential to your success. The Sixth edition includes new chapters focused on the health needs of Indigenous people along with

information on how to collaborate among interprofessional disciplines. Thoroughly reviewed by Canadian nursing experts, this edition ensures that you are well prepared to practise in Canada. Case studies include unique clinical application questions and exercises, allowing students to practise using care plans and concept maps. New photos capture the latest updates in skills and equipment relevant to Canadian nursing practice. Key points and key terms in each chapter summarize important content for more efficient review and study. More than 50 skills demonstrations provide illustrated, step-by-step instructions for safe nursing care — and include rationales for each step. The 5-step nursing process provides a consistent framework for care, and is demonstrated in more than 20 care plans. More than 20 concept maps show care planning for clients with multiple nursing diagnoses. A glossary provides quick access to definitions for all key terms. Cultural Aspects of Care boxes

summarize cultural considerations related to the chapter topic and provide practical guidelines for how to meet patients' cultural needs and preferences. Patient Teaching boxes help you plan effective teaching by first identifying outcomes, then developing strategies on how to teach, and, finally, implementing measures to evaluate learning. Focus on Older Persons boxes highlight key aspects of nursing assessment and care for this population. Planning sections help nurses plan and prioritize care by emphasizing Goals and Outcomes, Setting Priorities, and Teamwork and Collaboration. Implementation sections cover health promotion, acute care, and continuing care to prepare you for all levels of care in all settings. Unexpected Outcomes and Related Interventions for each skill offer alerts to potential problems and appropriate nursing actions. Procedural guidelines provide streamlined, step-by-step instructions for performing basic skills. UNIQUE! Critical Thinking Models in each clinical chapter show

students how to apply the nursing process and critical thinking to achieve successful clinical outcomes. NOC outcomes, NIC interventions, and NANDA diagnoses are incorporated into care plans to reflect national standards. Evidence-Informed Practice chapter includes the concept of research literacy and discusses quality improvement (QI) Learn the concepts and skills you need to provide excellent nursing care! foundations/fundamentals. Its comprehensive coverage provides fundamental nursing concepts, skills and techniques of nursing practice and a firm foundation for more advanced areas of study. This Second South Asia edition of Potter and Perry's Fundamentals of Nursing not only provides the well-established, authentic content of international standards but also caters to the specific curriculum requirements of nursing students of the region. SALIENT FEATURES Fully compliant to the INC curriculum Easy-to-read, interesting and involving disposition, which leads the reader through various facets of nursing foundations/fundamentals Improved layout, design and presentation A number of photographs replaced with the Indian ones to provide regional feel to the content Long Answer and Short Answer questions added at the end of every chapter This innovative text presents nursing fundamentals in a concise, visually attractive format that captures students' attention and addresses

dramatic changes taking place in the health care environment. At the heart of this revision is the critical thinking model presented as a practical, clinical decision-making guide and applied to the nursing process throughout. Case studies in all clinical chapters bring this process to life, demonstrating to students how using the combination of critical thinking and the nursing process will help them deliver comprehensive, professional care. Case studies introduce the client, family and nurse, and follow them through synthesizing knowledge and assessment data, planning and evaluating care. It addresses community health care and health promotion by consistently organizing each implementation section into three main areas: health promotion, acute care, and restorative care. Other themes include delegation, multidisciplinary collaboration, focus on outcomes, cultural sensitivity, gerontologic principles, and client satisfaction. * Complete coverage of fundamentals in a concise, readable, visually

appealing format. * Five-step nursing process provides a consistent framework in all clinical chapters. * Hundreds of color photographs and drawings increase educational value while adding visual appeal. * Client teaching covered in both narrative and boxes to highlight this key nursing role. * Skills are presented in a clear, two-column format with rationales for all steps. NEW FEATURES: * Critical thinking model provides a practical, clinical decision-making guide applied to the nursing process. * Case studies in all clinical chapters include the client, family and nurse, and are developed throughout the chapter to demonstrate the ongoing nature of nursing care. * Implementation consistently addresses health promotion, acute care, and restorative care to reflect the current focus on community-based nursing and health promotion. * Skills include guidelines to assist nurses when delegating to unlicensed assistive personnel, Critical Decision Points, Recording and Reporting, and Home Care Considerations. *

Expanded evaluation includes both the nurse's and client's perspectives to stress today's "customer satisfaction" emphasis. * Care Plans based on the case studies highlight key assessment data and include client goals and expected outcomes. * Procedural Guidelines provide step-by-step instructions for performing basic skills in a clear and concise format. * Cultural focus is reflected throughout and in special boxes to highlight the importance of cultural sensitivity. * Collaborative care and multidisciplinary problems are addressed in narrative and care paths/maps to reflect current health care focus. Building on the strengths of the fourth edition, *Basic Nursing: Essentials for Practice* is back in a new edition! Thoroughly updated and revised to provide a more focused and engaging presentation, this new edition offers the basic principles, concepts, and skills needed by nursing students. The five-step nursing process returns to provide a consistent, logical organizational framework, with a clear writing style and numerous learning aids. An increased emphasis on caring, along with new boxes on Focused Client Assessment and Outcome Evaluation, reflect current practice trends. This new edition is better than ever! Five-Step Nursing Process provides a consistent organizational framework. More than 40 nursing skills are presented in a clear, 2-column format with rationales for all steps. Procedural Guidelines boxes provide streamlined step-by-step instructions for performing basic skills. Growth and Development chapter and age-related considerations throughout clinical

chapters help prepare students to care for clients of all ages. Sample Nursing Care Plans highlight defining characteristics in assessment data, include client goals and expected outcomes in the planning section, and provide rationales for each nursing intervention. Progressive Case Studies follow the interactions of a client and nurse throughout the chapter to illustrate steps in the nursing process and develop critical thinking skills. Brief coverage of higher level concepts including research, theory, professional roles, and management, maintains the text's focus on essential, basic content. The narrative style makes the text more engaging and appealing. Focused Client Assessment boxes provide specific guidelines for factors to assess, questions and approaches, and physical assessment. Content on delegation is discussed throughout the narrative and specific guidelines are included for each skill. Skills now include Unexpected Outcomes and Interventions to alert for potential undesirable responses and provide

appropriate nursing actions. Caring in Nursing is presented in a new chapter and as a thread throughout the text. Outcome Evaluation are based on the chapter's case study and provide guidelines on how to ask questions and evaluate care based on the answers received. NIC and NOC are discussed in the Nursing Process chapter to provide an overview of these taxonomies encountered in practice. NCLEX-style multiple-choice questions at the end of each chapter help students evaluate learning. Potter and Perry's Fundamentals of Nursing, 5e continues to set the standard as the leading fundamentals text for Australian and New Zealand nursing students. The 5th edition has been carefully revised and restructured, focusing on the very important basics - the fundamentals of care that are the building blocks on which professional nursing practice is built. Potter and Perry's Fundamentals of Nursing 5e will prepare students for the dynamic and evolving nature of nursing practice

and will challenge them to become competent, engaged and agile nurses of today, leading the way to be effective nurses of the future. The importance of safe and effective person-centred care continues to feature throughout, with a new emphasis on professional responsibility and accountability. Clinical examples and Critical reflection points highlight how the quality of nursing care, knowledge and skills can impact people's lives and mean the difference between recovery and ongoing illness and complications
